

The logo for OCEA UK, featuring the text "OCEA UK" in a bold, white, sans-serif font. The letters "O", "C", and "E" are significantly larger than "A" and "UK". A stylized blue wave graphic is positioned behind the text, curving under the "O" and "C" and over the "E" and "UK".

OCEA UK[®]

A 3D architectural rendering of an indoor swimming pool. The pool is rectangular with a light blue tiled interior and a dark blue tiled deck. A white, slatted automatic pool cover is partially retracted, revealing the water. The pool is set in a modern, minimalist room with white walls and a white ceiling. A large, curved blue wave graphic is overlaid on the bottom right of the image, partially obscuring the pool deck and the text below.

Automatic Pool Covers

Introduction

As a the leading manufacturer of fully automatic pool covers and thanks to our innovative approach, we have a solution to suit every pool, whether indoor or outside. Our covers are available in a wide range of colours and finishes and are made using cutting edge materials which work hard to provide safety, longevity, retain heat, reduce condensation and algae - all whilst providing a spectacular finish to your pool. This brochure will introduce you to our range of systems, colours and finishes and help you to make the right choice for your pool.

- Suitable for all types of pool
- Minimal interference for existing pools as no shell adaptation required
- Made to measure

Edge Simple

Edge Wood Bench

Edge Aluminium Bench

Slat Colours and Properties...

We offer two material options for our pool covers – PC Eclipse Profile and PVC.

PC Eclipse Profile:

The new Eclipse Profile takes solar covers to another level. Specially engineered to include a hidden chamber, which means that dirt or algae between the slats is reduced to a minimum.

The slat connection is designed to ensure there are no breaks in the solar coverage, which improves the heating capability of the covers. The joints between each slat are strong but also flexible, and are designed for easy fitting and quick replacement or maintenance of individual sections. The addition of a protective UV layer means the cover is fade free and extends the lifetime of the product. Polycarbonate is our elite option and comes in a wide range of contemporary colours and a 5-year guarantee.

- Solar properties for heat retention
- 5-year guarantee
- Anti-Algae profile
- Shock resistance and rigidity
- Resistant to hail stones up to 20mm
- Not affected by high temperatures

PVC:

PVC has been used as a plastic slatted cover material for almost 30 years.

Ocea believes that to make a perfect product we need to use only the perfect ingredients, no compromises. As a result, we have sourced the highest quality PVC plastic granules for use in the extrusion of our slats. This allows us to produce the finest PVC slats on the market. This not only gives you great performance but also the best value, and our PVC covers come with a 2-year guarantee.

- Rigidity
- Safety
- Heat retention
- 2-year guarantee
